

# EZPDF/400 case study

## Company Overview

**Company:** AER Manufacturing LLP  
**Industry:** Engine & Transmission Manufacturing  
**Location:** United States

## The Challenge

AER Manufacturing LLP, a high-volume engine and transmission manufacturer, needed to eliminate manual printing and streamline document distribution. Prior to implementing EZPDF/400, the company relied heavily on printing customer statements and operational documents, leading to high costs and inefficiencies.

"At the time of selection, EZPDF (just) fit our needs."

— Patrick Vo, Sr. IT Analyst,  
AER Manufacturing

## The Solution

AER implemented EZPDF/400 to automate PDF generation from spool files. What began with converting statements expanded to include:

- Invoices
- Pick Tickets
- Packing Lists
- Operational Reports

AER also developed in-house utilities to deliver documents in both portrait and landscape formats, improving accessibility and internal workflows.

"It is integrated in everything that we do here at AER."

## Key Features Used

- PDF file creation from SCS spool files
- Automatic naming and formatting
- Custom-built utilities for layout handling
- Downstream integration with email and archiving

## Summary

EZPDF/400 has become a foundational tool at AER Manufacturing LLP, replacing paper-based processes with fast, reliable, automated PDF generation.

- Reduced operational costs
- Over 10,000 documents processed monthly
- Increased internal efficiency and digital transformation

## USAGE SNAPSHOT

**10,000+ documents converted monthly**

**No more printing**

**Improved productivity through automation and ease of use**

## Results at a Glance

Benefit	Impact
Cost Savings	Significant reduction in printing, toner, and printer maintenance
Process Efficiency	Faster document distribution and less manual handling
Ease of Use	Minimal training required; fully mastered in-house
ROI	Realized over 9.5 years of daily use

"It has saved us quite a bit of money... we never have to print anything unless we need to."

"For its cost, it is well worth it."

— Patrick Vo, Sr. IT Analyst,  
AER Manufacturing
